*I'm a former Australian living in Rhode Island with a passion for problem solving and design! Web development marries my love of a challenge with my obsession for detail and my desire to build great things for great people!*

## SKILLS

- WEB:** JavaScript, Query, AJAX, Node.js, HTML, CSS, SASS, React, Express, Bootstrap, Ruby, Rails, SQL, postgresSQL, Git/GitHub
- DESIGN:** Illustrator, Photoshop, InDesign, SketchApp, InVision, wire-framing, site-mapping, design mock-ups & prototypes, icon design

## EDUCATION

2018 **General Assembly**  
Web Development Immersive

2017 - PRESENT **RISD Continuing Education**  
Graphic Design Certificate

2010 **BFA (Photography major) - Bachelor's degree in Fine Art**  
National Art School, Australia

2006 **B.Econ/LLB - Economics(Social Sciences)/Law**  
Honors 1st Class  
University of Sydney, Australia

## WEB DEVELOPMENT EXPERIENCE

2018 **General Assembly:** Web Development Immersive  
 Completed a 12 week, 500+ hour full stack web development course. Trained in a variety of programming languages learning both frontend and backend fundamentals.

- Created full-stack applications individually and in a team setting.
- Built RESTful APIs and integrated data from third party APIs
- UtilizedGit/GitHub for version control

### Capstone Project: GLUG

GLUG is a wine preference tracker. GLUG is a SPA built on the MERN stack (MongoDB, Express, node.js & ReactJS) GLUG employs token authentication and CRUD functionality. GLUG also utilizes Cloudinary's React SDK to allow a user to upload and store image in a personal gallery as a visual supplement to their text-based preference notes. GLUG also showcases custom logo design, selective MaterialUI components and responsive design.

### Team Project: IMS: Inventory Management Solutions

My team created a MongoDB/Express based API and custom JavaScript client to allow users to create inventories and track quantities. I acted as Scrum-master throughout the project and used both Trello and Jira for project management.

### Featured Project: catSnack

A pet food tracker for pet owners. catSnack is a full stack application (custom JavaScript frontend and custom Rails API) with CRUD functionality and token authentication. catSnack uses a PostgreSQL database, consumes a 3rd party API and showcases custom logo design.

### Featured Project: TicTacToe

Built a front-end JavaScript TicTacToe application (including game-logic) that connects to a third-party Rails API via AJAX. TicTacToe employed token authentication and CRUD functionality. TicTacToe also showcases custom logo design.

## WORK EXPERIENCE

2017-2018 **Blick Art Materials, Providence RI:** Sales Associate | operations, sales, customer experience

2013-2016 **Sephora, Champaign IL:** Skincare Manager | setting sales & productivity KPI's, team management, training, operations

2010-2013 **Banana Republic, Champaign IL:** Customer Experience Manager | sales KPI's, operations, team management, customer service
